

# MIT<sup>®</sup> Oracle Z-Cord<sup>®</sup> Reference AC Power Cord

**The next step in non-networked AC power cords.** The new Oracle Z-Cord Reference power cord is constructed using the highest quality materials combined with MIT's unique high performance cable.

The Oracle Z-Cord Reference features proprietary hand-wound cable with perhaps the best measureable performance of any non-networked AC cable on the market today. This unique winding topology combined with the highest quality silver-clad conductors and the finest dielectrics results in an AC power cable that exhibits an extremely low noise floor and reduces dielectric distortions to well below the audible level. The benefits of this intense attention to detail are greatly improved dynamic contrasts, improved low level detail, and proper image localization and stability.

## Features & Benefits:

- Silver-Clad conductors and highest-quality dielectrics
- Extremely low noise floor for below audible distortion levels
